Unlike

In 1933, the richest and most powerful country in the world did something unthinkable: it banned its citizens from owning gold.
By direct order of President Franklin D. Roosevelt, millions of Americans had to surrender their coins and bullion to the government… under threat of imprisonment.
It wasn't a robbery. It was a legal order.
And it changed the history of money forever.

In this episode of El Cronista Financiero, you'll discover how and why the United States confiscated its own people's gold, how that decision allowed the state to control the value of money, and why its legacy continues to affect your economy today.

📌 In this analysis:

Executive Order 6102: the decree that turned gold into contraband.

How Roosevelt "revalued" gold and enriched the state at the expense of its citizens.

The creation of modern fiat money and the birth of Fort Knox.

The end of the gold standard and the new era of money based on trust… and debt.

Why this episode lives on in every crisis, inflation, and financial bailout of the present.

💡 The day the United States stole its citizens' gold wasn't an anecdote.
It was the beginning of the monetary system that still rules the world.

🕰️ The history of money doesn't repeat itself… but it rhymes.
And if you don't understand it, it crushes you anyway.
